***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims **1-28**, drawn to a method for separating isotopes of an element, classified in class 204, subclass 157.2.
- II. Claims **29-39**, drawn to a method for separating chemical species, classified in class 204, subclass 164.
- III. Claims **40-45**, drawn to a method of modifying the ionic characteristics of a plasma, classified in class 250, subclass 282.
- IV. Claims **46**, drawn to a method for vaporizing aggregates in an ablation plume, classified in class 204, subclass 164.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, III and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation, different functions, and different effects.

Group I is directed to separating isotopes.

Group II is directed to separating chemical species.

Group III is directed to modifying a plasma.

Group IV is directed to vaporizing aggregates.

Directing a laser onto a plasma containing isotopes, chemical species, plasma and aggregates are distinct.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
